**MILLEIS Banque chooses OLYMPIC Banking System as its SaaS platform**

ERI Bancaire is proud to announce that it has signed a software-as-a-service (SaaS) contract with Paris-based Milleis Banque (formerly Barclays France).

This choice is consistent with the bank's repositioning strategy following its acquisition by the British investment fund AnaCap. Milleis Banque's 70 branches in mainland France employ close to 1000 people and serve more than 140 000 customers. It offers retail banking and asset and wealth management services, targeting high-net-worth clients.

"We have opted for OLYMPIC Banking System, provided by ERI, a specialist in private and medium-sized banks," Philippe Vayssettes, Director-General of Milleis Banque, announced. "This solution, in SaaS mode, will allow us to 'plug and play' external tools and also to reduce the complexity of our IT architecture significantly, be more flexible and optimise our processing procedures."

Jean-Philippe Bersier, ERI's Director of Business Development, said: "We are honoured to have been chosen by Milleis Banque. In an increasingly competitive environment, Milleis will benefit from OLYMPIC Banking System's latest developments, especially those in the digital and mobile arena. In addition, our SaaS-OLYMPIC offering is particularly well-suited to establishments seeking a solution that combines the best software components with an extremely high level of security as well as flexible implementation.

The installation of OLYMPIC Banking System and the numerous partner products that make up the SaaS platform began at the start of the year.
